Hello Mr. Baker,

I wanted to update you on the Jim Sorensen Mining Permit that has comments for the NOI permit of the third revision due today. While we could submit it today, we are still working with the County on obtaining a Conditional Use Permit to define the actual mine permit area.

May we please have an extension until next Friday (Jan. 29th, 2016), to make sure that everything is taken care of. We believe that this will save a revision and divisions time so that we can get this project wrapped up as efficiently as possible.

Thank you!

**Kimberly M. Coburn**

Does the NOI rely on the storm water permit as the sediment/stormwater control plan? Or does the NOI have a separate plan (which should obviously be consistent with the industrial storm water permit)? If the NOI can stand alone without this document and the County's conditional use permit, I would ask that you submit the NOI without these items.

I hope this makes sense, but let me know if you have questions about what I said. Thanks.

Hello Mr. Baker,

The NOI area of disturbance for bonding is in question. One of the areas is a parking lot for equipment storage not part of the mine, that with a conditional use defined for that area would exclude it from bonding and the mine.

Please let me know if that makes since.

Thank you!

Hello Mr. Baker,

It appears that the conditional use permit is a month out from being approved. May we please have an extension of the NOI submittal until next Monday (2/8/16)?

Our plan now is to revise the NOI to include the entire disturbed area and then apply for an addendum later once the conditional use permit is approved. We also need to go through the revised plan with Mr. Sorenson for his approval. I apologize for the delay.

Thank you,

The extension you request is reasonable. Please consider it approved. I will change our database and print this message for the file. Thank you.
